List of all veterans' names and in which volume they appear

As research continues, the list of names is constantly changing, either because more names come to light or the initial identification from the name as recorded on the memorial has been incorrect.

Since publishing Volume 1, an additional number of veterans in the range A to F have been identified and their names appear at the end of this list under the heading ADDENDA. Their stories are told in Volume 4.

Readers will note that the following list contains some surnames with initial/s only – these are taken directly from a memorial. Unfortunately we have not been able to identify these people. The name may of course refer to a person we have identified, e.g. "BAKER, H" could be either Harold Edward Baker or Henry William Baker.

Please note that chapters on several prominent members of our community have been written. These include CEW Bean (Volume 1), William Ifould (Volume 2) and TW Edgeworth David (Volume 3).
